PRODUCT: CHP & WHP America Series  
Air Handlers

## New Air Handler Condensate Pump System

EMI is pleased to announce that we are expanding the use of the new EDC brand condensate pump system as the Sauermann pump will no longer be available.

The EDC condensate pump was released earlier this year for use on the WHP (Wall) air handlers and is now available for use on the CHP (Ceiling) air handlers.

The EDC condensate pump system is available in either 110 or 220 volts. New features include a plug and play method of installing this pump (Molex plug connection, no more time consuming hard wiring related to the control box), an inline filter, a relocated pump assembly for easy installation and maintenance and a quieter more powerful pump allowing for condensate lifts up to twenty feet.

Please be aware there is a price increase associated with the EDC pump. For information regarding pricing, contact the EMI Customer Service Department at 1-800-228-9364.

New kit numbers have been developed to reflect this change. The chart below provides the listing of the old kit numbers and their corresponding replacement.

### Condensate Pump Kits

#### Old Sauermann Pump Kit

#### New EDC Pump Kit

550-1009 (Whp 115 V)  
550-1010 (Whp 208/230 V)

550-1201 (Whp 115 V)  
550-1202 (Whp 208/230 V)

550-1011 (Chp 115 V)  
550-1012 (Chp 208/230 V)

550-1221 (Chp 115 V)  
550-1222 (Chp 208/230 V)

550-1206 (Whp 115 V)  
550-1205 (Whp 208/230 V)

550-1201 (Whp 115 V)  
550-1202 (Whp 208/230 V)
