ECR International is pleased to announce the release of the EMI America Series full range multizone heat pumps. The full range feature allows for operation of the heat pump to 0 °F (-17.8 °C). These new models also allow for simultaneous heating and cooling in separate zones, a specifiable feature for the America Series.

The new models are the America Series top discharge series: T2HB, T3HB and T4HB. With the addition of the top discharge models to the previously released side discharge units (S2HB), the complete line of America Series multizone heat pumps is now available. The "B" in the model number indicates the full range option.

All prior options and accessories are available on the full range models. Orders can be accepted immediately.
